

## **KALANEUVOS OY – THE LARGEST FISH SMOKING COMPANY IN THE NORDICS**

- The new factory expansion was commissioned in November 2019.
- Construction on the expansion started in July 2018.
- The renovation of the older section of the factory will be completed in spring 2020.
- The total investment is approximately 28 million euros.
- We have recruited and will continue to recruit a total of roughly 30 new employees.
- The floor area of the production facilities will be increased to more than 11,000 square metres.
  
- Our fish smoking capacity will more than double to 40,000 kg a day.
- Our smoking capacity will be approximately 10 million kilograms of fish a year.
- A total of 13 smoking ovens, one oven can hold about 1000 kg of fish at a time.
  
- Our filleting capacity will more than double and become more efficient; we will be able to fillet approximately 70,000 kg of fish per day.
- Our annual filleting capacity will be approximately 12 million kilograms.
- Filleting line equipment's total price over 5 million euros.
- The latest and highest quality filleting line on the market.
  
- We have also invested in new packaging lines, machines and equipment as well as four robots.
- The expansion to the factory will also boost processed fish product export.
- We will be working in two shifts, six days a week. During peak season, we will be working seven days a week.
- We utilize the fish raw materials 100 %.
